HEARTY RISE

feel the difference

HR HEARTY RISE

We at Hearty Rise Europe GmbH have been building and distributing high-quality spinning and baitcasting rods for predator anglers in Europe for over a decade. The Hearty Rise (HR) brand is the private label of Etouh, a producer of high-performance rods for numerous renowned international brands. As the Europe-wide distributor of the «Hearty Rise» brand, we work with engineers specifically dedicated to rod construction to achieve maximum quality, performance, and aesthetics, perfectly tailored to European fishing. Our diverse product range extends from lightweight trout and perch rods to heavier zander and pike models and powerful sea rods. For the special TOC fishing for salmonids, we also offer high-quality models that meet the demands of anglers.

The heart of our rods is and remains the proven Hearty Rise's high-end carbon NET-V III technology - increasingly lighter, more resonant and more solid!

The latest jewel in technology is the TorayCA® T1100G manufacturing process. In combination with our powerful and proven NET-V III winding technology, we have created our new Predator IV series of even lighter, faster, and overall better blanks that take predator fishing to a new level.

We have answered the demand for affordable entry-level rods with the new Red Shadow series. Another latest feature is our new Dark Soul collection, which includes a wide variety of different models for spinning and baitcast reels. Hearty Rise quality with an entry-leveled price.

We have also expanded the range of travel rods enormously. So with us you will your travel rod for all kinds of predatory fish.

Every single model, whether spin or cast, is made of high-performance carbon and is meticulously handcrafted and tested to our highest quality standards. Quality and design that inspire anglers!

We wish you a nice and successful season!

Your Hearty Rise-Team

TECHNOLOGY HEARTY RISE

The Hearty Rise (HR) brand is Etouh's high-end own brand. Etouh mainly produces high-end rods for numerous renowned Japanese brands and Hearty Rise. For almost 40 years, the production quality has been steadily increasing and the processing of the carbon mats has been further refined. Processing processes such as NVC, SNVC and Nano NVC as well as the NET-V winding systems are an example of the company's know-how. The European range is specially tailored to fishing in Europe and the know-how of our pro staff and fishing guides was incorporated into the products.

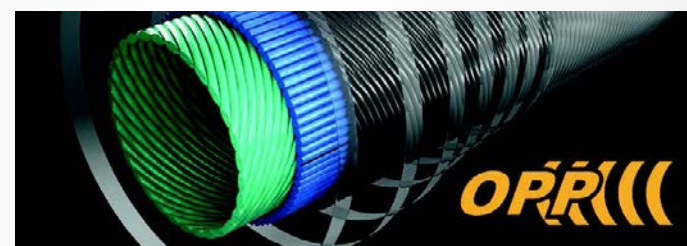

NVC- & NVC-CARBONPROCESSING

To combine lightness and performance, Hearty Rise works on the complex balance between reducing resin and increasing carbon content. The result is a very high density material that results in lighter, thinner and extremely powerful blanks! The NVC and SNVC processes reduce the amount of resin and increase fiber tension.

NET-V II CARBONASSEMBLY

The NET-V II uses the best materials from Japan and optimizes the carbon winding. Multi-angle weaving of the fibers was studied to increase the power reserve and improve the morphological memory of the blank by 15% compared to the NET-VI. Its strengths are torsional strength, power and resonance.

PRODUCTION OF THE OPP BLANK

With this technology, a technical finish is applied after the carbon layers are wrapped. The thin OPP film preserves the effect of the blank while protecting it from scratches and impacts. Without the classic addition of paint and varnish, the resonance of the blank is enhanced, the feeling of bite is at its peak.

NANO NVC-HARZ

Nano NVC uses nanostructured polymers to create a denser resin with more effective adhesion. This compact resin is better distributed over the carbon layers. It brings with it improved conductivity for a better feel of the bite and the ground. The carbon is lighter, thinner and at the same time more sensitive.

TORAYCA® T1100G CARBON

TorayCA® T1100G is the name of a new generation of carbon fiber mats. The excellent properties of this material enable an even faster blank and more direct bite detection and feedback from the blank. Without compromises! Predator fishing reaches a masterful level with the new jewel of technology!

NET-V III CARBONASSEMBLY

The NET-V III is a further development of the carbon fabric NET-V II. This technical structure consists of three diagonal, vertical and reverse diagonal fibers. This construction makes it possible to combine two opposite properties: the strength of the blank and the lightness. The action is extremely fast and provides a unique bite sensation!

REINFORCEMENT DOUBLE HELIX-X

The Double Helix-X is a reinforcement of the carbon blank by adding a double cross structure. The X-shape of the chuck makes the rod more responsive and stable. The memory of the blank is perfect and long lasting. Whether casting or fighting a large fish, the rod is more responsive and the power reserve is increased by 20%!

TEN YEARS ANNIVERSARY LIMITED

On the occasion of our 10th anniversary, we have designed a top-class spinning rod series for you, in a one-off limited edition. Thanks to extensive engineering, practical work and the use of the best components, as our NET-V III carbon blank, our rod series impresses with phenomenal power! The fine tip action of the three models, as well as the powerful backbone allows you to fight powerful predatory fish. As zander, perch, pike and all others. Our „Ten Years Anniversary Limited” series is already a popular collector's item among enthusiastic predator anglers. We offer you three different spinning rod models that will inspire you!

TOP GUN PRESTIGE SPINNING

The aesthetics and action of the Top Gun Prestige rod series make it real collector's items. With the use of Fuji KL Titanium rings, the thinnest and lightest ring set from the well-known Japanese brand, it makes the rods lightweight. Through the highly developed NET-V III Carbon Blank, every model brings enormous stability and power. The very Ergonomically futuristic handles ensure a good grip long throws and in drills. The incredible finesse and extreme resonance these rods let you feel the slightest touch.

TOP GUN PRESTIGE CASTING

The aesthetics and action of the Top Gun Prestige rods also make the cast models real collector's items. The thinnest and lightest guide set, Fuji KL Titanium Torzite from the Japanese brand, is built on the proven NET-V III carbon blank and allows your line to slide almost smoothly through the rod rings, giving you a phenomenal casting distance for a wide variety of artificial lures. The ultra-light Top Gun Prestige Casting models have futuristic and ergonomically shaped handles and offer you optimal grip for long casts and when fighting powerful predatory fish. The incredible finesse and extreme resonance of these rods let you feel the slightest touch and never miss a bite.

NEW PREDATOR IV

The Predator Series - our new flagship in spinning rod construction! With the new edition of our popular «Predator» series, we're setting the standard for built-in technology and workmanship higher than ever before! By using the latest generation of TORAYCA T1100G carbon fiber mats, combined with the perfected processing of our NET-V III carbon technology, we've created harmonious rod blanks that exhibit exactly the desired flex behavior and make spin fishing even more successful! The modern, elegant, and extremely thin design, enhanced by high-quality EVA and completed by a new FUJI carbon reel seat, which stands out for its ergonomic handling, results in an excellent price-performance ratio! Nine different models, each of which has undergone several months of development by our team, are available for purchase!

INNOVATION SPINNING

The established top rod from Hearty Rise is called "Innovation". This rod impresses with its sensational lightness and power. It's hard to beat when it comes to fast action. The innovation is so sensitive at the top that every tug, no matter how small, is noticed immediately. The rod is perfectly balanced with a reel that weighs around 200 grams despite the short handle. The throwing distances are phenomenal, as is the workmanship. Only the best. The blank was completely rebuilt and the new NET-V III technology was used for the first time on a very light rod. This makes the rod a bit better in all areas. Fuji Titanium Torzite was chosen as the ring set. As always, the reel seat is from Fuji.

ZANDER GAME XT

Our estimated rod series is called "Zander Game XT" and impresses with highend features that are hard to beat. Predator anglers who are into big zander will be thrilled! The blank of these extremely powerful spinning rods is based on the highly developed TorayCA® T1100G Carbon, a highly advanced processing of the latest carbon technology. Together with our proven NET-V III Carbon technology, the blank is even faster, stronger and more sensitive than ever before. An extremely uncompromising transmission allows you to fish with sensitivity, so that your expectations are exceeded! The speed of the blank is like a phenomenon and transforms the zander's bites into impressive fighting experiences. The models in our Zander Game XT series are available in many different designs and, depending on their characteristics, are suitable for heavier perch as well as powerful pike fishing. With the Zander Game XT, spin fishing reaches a new high level!

METER OVER CAST

Meter Over Cast - our significant rod series for the discerning predator angler who is targeting the very large predatory fish of freshwater or even big marine fish such as cod and halibut. Each individual model is extremely powerful and is characterized by the processing of exquisite components in the usual Hearty Rise quality. The design is simple and at the same time modern. The ergonomically and innovatively shaped EVA handle is very comfortable to hold, allows you to cast the hotspots precisely and supports you optimally when fighting strong predatory fish.

DARK SOUL SPINNING

Sporty, powerful and elegant - our current Dark Soul Spinning series is a real all-round talent and ideal for many types of fishing. Each individual model has been designed through extensive engineering work for spin fishing with a wide variety of artificial baits. The features of the models enable the seductive presentation of soft plastic lures, twitchbaits or craws on the finesse rig. The powerful backbone of the Dark Soul Range is strong, but not too strong and offers enough challenge for big pike or zander. The design is eye-catching and exquisite. It makes the rods real eye-catchers.

DARK SOUL CASTING

Dark Soul Casting - for versatile baitcasting fishing for zander, perch, pike and co. Our progressive Dark Soul Casting series is based on selected components, such as the proven and powerful NET-V III carbon blank and Fuji Alconite ring set. The phenomenal properties enable your bait to be cast long distances and achieve the best accuracy, as your line glides almost smoothly through the rings. The adapted rod action works very quickly and reliably, so that you can use the current Dark Soul Casting models in a variety of ways.

VALLEY HUNTER SPINNING

The Valley Hunter Spinning series is a beautiful rod series and is characterized by its particular speed. It is extremely suitable for light jigging, drop-shotting and for presenting lighter hardbaits such as twitchbaits. The asymmetrical division corresponds to the new Japanese trend and leads to great rod action. The components are top-NET-V III, high-quality EVA, Fuji SiC rings and Fuji reel seat. An ideal rod series for fishing for perch, pike, zander and many other predatory fish found in freshwater.

VALLEY HUNTER CASTING

The casting models of the Valley Hunter series start with a very light casting weight of just 10 grams, while the Heavy Pelagic or Pelagic rod types with a casting weight of up to 140 grams have a really strong backbone and can effortlessly tame large predatory fish.

EVOLUTION III SPINNING

The name is program! The Evolution III series is considered a valued spinning rod collection by demanding predator anglers! The «Funstick» from Hearty Rise at an entry-level price! Overall, in the previous models the action was largely left as it was. The series has been visually revised and the highly developed NET-V III carbon blank now serves as the basis. From the 1st ring onwards, each model is painted without paint and receives the special OPP coating. The OPP coating, paired with NET-V III technology, enables greater resistance while maintaining sensitivity. Lightweight Fuji KL and K rings ensure smooth line running and increase the casting distances of a wide variety of artificial lures.

EVOLUTION III CASTING

The Evolution III casting models have the best features to attractively present a wide variety of artificial baits to predatory fish. The exquisite and high-quality components enable the hotspots to be fired precisely and offer a very sensitive transmission. Even hesitant bites will no longer go unnoticed with these models, so you can make a direct attack and an exciting drilling experience begins. The design is elegant and sporty. The fine golden decorative windings underline the high quality of the individual components. The black EVA handle sits comfortably in the hand and completely rounds off the profile. A rod series that has a particularly elegant aesthetic and full performance.

SUONALUTION SPINNING

The spinning models from the first Suonalution edition were already able to successfully demonstrate their excellent properties, as they are predestined for active predator fishing. Together with the Suonalution rods from the current range, we offer you a collection that consists of very important and strictly selected spinning models from both editions. The semi-parabolic rod action allows controlled fishing for bass, but they are also perfect for perch, zander and even pike. The backbone is remarkably powerful and shows real power in the fight against big predatory fish! Suonalution Spinning - the valued series for demanding predatory fish anglers who want to perfectly pursue the target fish.

SUONALUTION CASTING

The Suonalution casting rod series includes important and strictly selected baitcasting rods from the first and now second edition, which have established themselves due to their properties. They make it possible to throw fish at freshwater predators with considerable precision. The exclusive HR reel seat and the Fuji K-rings complement the NET-V III carbon blank. The models are characterized by elegant cosmetics, a combination of high-quality cork, carbon technology and silver-colored finish properties. They cover the majority of baitcasting fishing for pike, perch and bass. Endless fun!

BLACK FORCE SPINNING

In recent years the demand for an affordable all-round spinning rod series has increased enormously in both fresh and salt water. With our Black Force Spinning series we have fulfilled exactly this wish and it has already emerged as an important range in the past. The blank was manufactured using the NET-V II process. The Fuji K FaZLite ring set used is 7x less susceptible to corrosion than conventional stainless steel frames because it has a high-performance aluminum CC surface. The blue FazLite surface not only looks good, but is Fuji's answer to cheap no-name SiC inserts from various manufacturers. The action of the rods is fast, but not too fast. It doesn't polarize much. Just a balanced all-round rod that can be used for almost any purpose. Whether for perch, zander, pike, pollack, coalfish, sea bass or cod. She always cuts a good figure.

RED SHADOW SPINNING

The Red Shadow rods are built on the excellent NET-V III carbon technology. Every single blank has above-average sensitivity and great throwing properties. They are equipped with Alps «iF Guide» rings made of zirconium and a Teflon coating for optimal service life. The individual rod models are suitable for active spin fishing for many different predatory fish. Numerous fishing methods, such as jigging, twitching or just reel in, can be achieved with this rod series.

RED SHADOW SPINNING DISTANCE

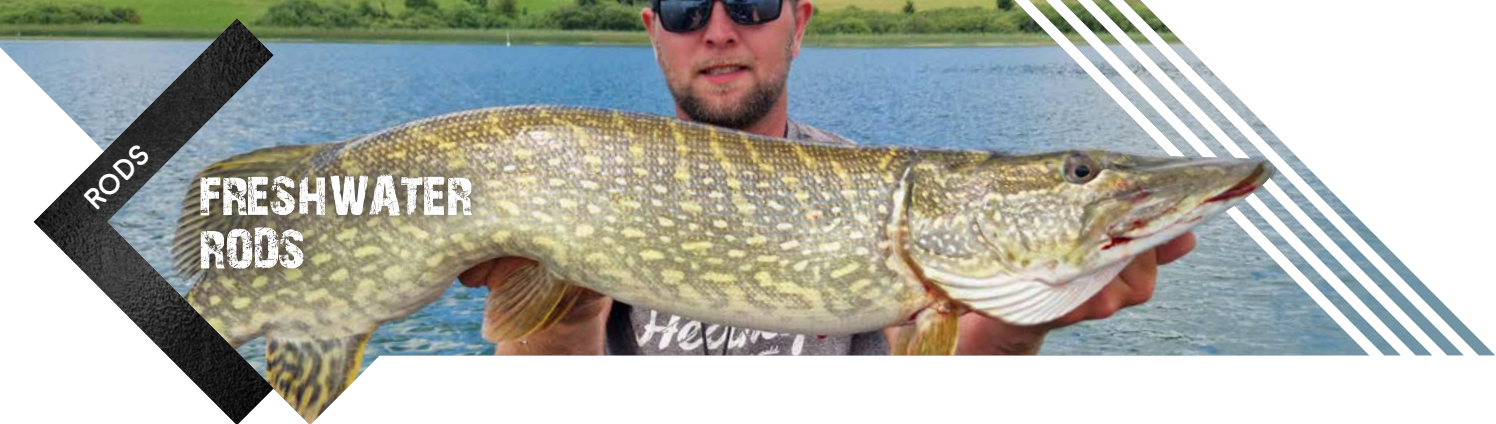

Here the name is program -DISTANCE! The seven models are dedicated to fishing over long distances in fresh and salt water. With the ALPS <IF Guide> rings made of zirconium, which have a Teflon coating for optimal service life, this rod series is ideal for spin fishing and offers phenomenal transmission. With these types of rods, no bites will be hidden from you, no matter how far away they are!

RED SHADOW VERTICALE SPINNING

The Red Shadow Vertical Spinning rod models are equipped with an exceptional blank based on NET-V III technology. Combined with the Alps <IF Guide> rings made of zirconium, which have a Teflon coating for optimal service life, this series is ideal for vertical predator fishing. In addition, each blank is equipped with a full carbon tip that offers high sensitivity and great touch detection!

RED SHADOW BAITCASTING

The Red Shadow baitcasting rods - highest quality at an entry-level price! The Alps <LMXN> rings made of zirconium are located close to the blank to minimize annoying tangling of the line, to achieve maximum casting distance and to increase sensitivity even more. The design of this collection has a reddish aesthetic and shines with fine gold applications. The equivalent black and hand-shaped EVA handle ensures the best grip during the fight and completes the profile.

ROCK'N FORCE II SPINNING

The Rock'n Force II is «the high light» in the ultra-light range. This series of rods is perfect for clearly presenting the smallest baits. Whether for ultra-light sea fishing, bass fishing or trout fishing, it always impresses. With the 2nd edition we managed to replace the extremely sensitive «solid tip» with a wafer-thin and continuous blank. A masterpiece of engineering! The design: simple and elegant. The weight: like a feather. The equipment is awesome: NET VIII, SNVC, 4Axis, Fuji SIC with Titanium Frame, Fuji Seat. First-class spinning models for the discerning predator angler who wants to easily present the smallest softbaits!

ROCK MASTER SPINNING & CASTING

Our impressive Rock Master series for light spin and baitcast fishing! This rod series was developed for ultra-light sea fishing, also known as rock fishing. However, we have found that this collection is also ideal for fishing for salmonids and perch. Thanks to extensive engineering and the use of the most ingenious components, the NET-V III Carbon Blank works extremely sensitively and optimally cushions the shaking heads of predatory fish. You will be able to seductively present a wide variety of soft and hard baits with ease. The finest plucks from suspicious predatory fish will no longer be hidden from you, because this series is equipped with a solid tip. Orange decorative coils on the tip make it easier for you to immediately recognize gentle bites. The timeless and very elegant design underlines the high quality of the rod models.

LAIQUENDI SPINNING & CASTING

With this new series we have met the desire for a high-performance, high-end trout rod. With a casting weight of up to 8 grams, it is specially designed for ultra-light artificial baits such as micro spoons. Given the low casting weight, the rods work extremely quickly and are super sensitive. The handle made of first-class cork offers you the necessary grip and is comfortable to wear. The Laiquendi models shimmer in a pleasant shade of green and have subtle, gold applications in the hand part, giving them a modern and at the same time impressive design. Just the thing for trout fishing on streams and ponds. Ultralight fishing at its best!

DARK SOUL TRAVEL SPINNING

With our new Dark Soul Travel Spinning series, we have launched very light and at the same time powerful travel rods, which are based on our proven NET-V III carbon technology. Each model is ideal for fishing around Norway, as well as for warm water fishing for exotic predatory fish, and thanks to its small pack size, it fits in any suitcase. Powerful travel rods that give you an impressive fishing experience on your vacation!

DARK SOUL TRAVEL CASTING

Establishment meets expansion! Our engineers have succeeded in designing the proven Dark Soul Cast series as a travel rod while maintaining the same level of performance! The phenomenal properties, the use of coordinated components and the characteristic appearance of the six new casting models make each individual rod a reliable companion on your next fishing holiday.

WANDERER

Our significant Wanderer as a multi-part travel rod performs incredibly well. Each individual model from the Wanderer series is built on exclusive components and impresses with its versatile area of application. The highly developed NET-V III carbon blank is extremely sensitive, so that even the most timid bites from exotic predatory fish no longer go unnoticed. The good transmission and sensitivity allow maximum fun when fishing and, as we all know, this shouldn't be neglected on vacation. You will find a great selection of different models here.

SLASH MONSTER TRAVEL
PEACOCK SPINNING

Our Slash Monster Travel Peacock series has been specially developed for travelers who hunt peacocks in the Amazon region or search for large pike around the world. Each model has significant power and can be used in a variety of ways. With these rods, a wide range of artificial baits, such as sticks, poppers, bigbaits, bucktail jigs and propeller baits, can be easily cast and presented seductively. Thanks to the small transport dimensions, you can easily store the rods in your suitcase. The rods are made from Hearty Rise's highest quality NET-V III carbon fiber fabric. The exclusive Fuji components, the ergonomically shaped EVA handle and reel seat are comfortable to hold and ensure fatigue-free fishing. Ingenious rod models for spin and baitcast fishing!

TROUT RIVER NYMPHE

A top-class rod series for trout fishing. First-class cork, resonant NET-V III carbon, powerful Fuji Alconite ring set and workmanship that leaves nothing to be desired. Thanks to the use and processing of brilliant components, the Trout River Nymph gives you an impressive fishing experience. The most cautious bites from suspicious salmonids are transmitted without compromise. The rod action is perfectly tailored to salmonid fishing through extensive engineering and practical work and supports you optimally in the fight, so that the risk of losing a large trout is significantly reduced. The design: classic and at the same time elegant, because fine applications underline the high quality of the individual components and masterfully round off the profile.

TROUT GAME

Our Trout Game rod series is already a preferred choice among experienced trout anglers for actively and successfully pursuing salmonids. The high-quality components, such as the Fuji Alps IF-Guide guide set, are mounted on the renowned NET-V III carbon blank. The result: optimal casting distance, phenomenal transmission, effortless lure control, a tailored rod action, and a distinctive, classic design. Here you'll find a fantastic selection of different models perfectly suited to active, modern salmonid fishing with lighter artificial lures, such as spoons.

TROUT RIVER SPINNING

Through remarkable engineering and practical work, we have succeeded in creating an excellent collection that has brilliant properties, especially for demanding salmonid fishing with ultra-light artificial baits. Due to the short rod lengths, fishing on streams and rivers that are difficult to access is no longer an obstacle. The high-quality ring set allows your line to slide almost smoothly through the rings. The remarkable transmission consistently transmits careful bites from the salmonids, resulting in sensitive and more effective fishing. The classic and tasteful design gives the Trout River series a very special characteristic and makes it a real eye-catcher!

SALT MONSTER SW SPINNING

Our Salt Monster series was specially designed for active spin fishing in salt water and includes models that are perfect for sensitive finesse fishing as well as for powerful jigging and heavier vertical fishing. The perfect balance between rod length, casting weight and high-quality components in each individual model are phenomenal properties that take sea fishing to a top class level. The design is perfectly tailored to modern fishing in salt water and characterizes this diverse rod series.

DEEP BLUE SPINNING

Deep Blue Spinning, our rod series for spin fishing in the deep blue sea! The various rod models from our Deep Blue Spinning series are true all-round talents because, thanks to excellent development, they have ingenious properties and cover almost all types of sea fishing with artificial bait from the shore or from the boat. Particularly noteworthy is the grip area, based on our NET-V III carbon technology and reinforced with 3K carbon, as well as the special OPP coating on the rest of the blank, which enables phenomenal transmission of the smallest bites. The use of high-quality components, coupled with workmanship in the usual Hearty Rise quality, make the sporty models, created in a shade of blue to match sea fishing, a must-have!

GYOLUCK

The secret of the NET-V III technology in combination with the «Double Helix-X» connection creates a light and very powerful blank that is ideal for demanding fishing for tuna and other exotic fish. The rod models in our Gyoluck series are made with high-quality components, such as the Fuji SIC KW ring set. The selection of exquisite and corrosion-resistant components ensures an optimal service life of the rod models, so that drilling a wide variety of sea fish becomes an impressive experience. Powerful spinning rods in the usual Hearty Rise quality for demanding sea fishing – our Gyoluck rod series.

MONSTER GAME TUNA HUNTER SPINNING

Our new spinning series for demanding sea fishing will inspire you! It impresses with its power and lightness, which is predestined for hunting tuna and many other exotic predatory fish. The complex engineering work, highly developed NET-V III carbon technology, a powerful backbone and high-quality EVA in the handle area enable endless fun. The simple design is based on saltwater fishing in a matching sea green. The special color effect and the silver finish properties underline the high quality of the individual components.

SLOW JIGGING III S X TOKAYO

The Slow Jigging III series was specially developed for extreme slow jigging. Toray CA T1100G carbon fibers, coupled with nanotechnology and Double Helix-X, combine the fineness, power and progressive action of the blank like never before. The oversized carbon reel seat shines in an elegant flip-flop design. The fine silvery decorative windings of the integrated Fuji K Titanium rod rings, which are equipped with a high-quality ceramic insert, are an aesthetic eye-catcher. The features such as low weight, slim and powerful design and power make this rod series a jewel of technology.

NEW
SLOW JIGGING IV

Slow Jigging IV - a technological gem for sea fishing! Our Slow Jigging IV series is built on the proven Hearty Rise NET-V III carbon technology and is brimming with engineering expertise. The rod is made of Japan's latest high-strength and highly elastic TORAYCA «T1100G» nanocarbon fiber material, combined with TORAYCA M40X. This not only improves the high strength and elasticity, but also further reduces the weight. Slow jigging on a new level!

BLACK DIAMOND II SPINNING

The Black Diamond II rod series impresses with its extremely powerful and slim blank and has now been expanded with another, enormously powerful model. The properties of the first Black Diamond collection, as a pioneer of this new series, have been brought to the highest level. Even in the 150 g version, the rod shows extremely progressive power reserves. Perfect for fishing with softbaits in Norway as well as for jigging with special sea baits in the warm, southern sea region. Our Black Diamond II series consists of different spin and casting rods that are equipped with brilliant components in the usual Hearty Rise quality.

SKYWALKER POPPING

Fishing for exotic predatory fish is becoming more and more popular and is very trendy. The high demands of experienced sea anglers and the harsh conditions, such as rough salt water and hard-fighting fish, require powerful rods that can withstand corrosion. Thanks to extensive engineering work, we have brought a powerful rod series onto the market with the Skywalker Popping that meets the high requirements. Each individual model is built on selected components, such as the Fuji Alconite KW ring set, and is delivered in an easily transportable case approximately 71 cm long. Masterpieces with the best components!

SKYWALKER NORWAY SPINNING

Our brand-new and perfected performer for sea fishing - the Skywalker Norway Jigging Spin & Cast! This series includes high-performance travel rods designed for powerful fishing for pollock, cod, ling, and the like. Each model impresses with its lightness and optimal support when battling powerful sea fish. Durable components, such as the Fuji Alconite guide set, Fuji reel seat, and a strong blank based on our NET-V III technology, make even strenuous fighting a breeze. In this new catalog, you'll find a precise selection of different spinning and casting models, as well as rods for long-line jigging and deadbait fishing, which have already gained popularity among passionate sea anglers!

SKYWALKER SLOW JIGGING CASTING

The trend for versatile travel rods is constantly growing. With the Skywalker Jigging series we have brought very light travel rods onto the market that are versatile for fishing around Norway as well as for the warmer sea regions. Here you will find a great selection of different spin and casting models, which are built only on the best components in the usual Hearty Rise quality. Travel rods for the demanding predator angler!

TRAVEL RODS FOR EXOTIC FISHING AREAS

SKYWALKER SHORE JIGGING

Shore jigging, popular among passionate sea anglers, requires rods that can withstand harsh conditions such as rough salt water and the brutal escapes of exotic predatory fish. With the Skywalker Shore Jigging series we offer you exclusive rods that are perfectly tailored to the traveling shore angler. Excellent components, brilliant workmanship in the usual Hearty Rise quality and also a great transport size so that you can stow your travel rod in almost any hand luggage. Each model from the Skywalker Shore Jigging series is delivered in a comfortable case, which is around 70cm long. Here you will find a great selection of different models for spin fishing for groupers and co. Fishing for exotic sea fish with the best shore jigging rods, endless fun!

LINE PREDATOR WX8

Predator WX8 - already a very preferred fishing line for demanding predator anglers, which has a solid price/performance ratio. This current Hearty Rise braid is made from the latest generation of Japanese UHMWPE fibers (or PE, like polyethylene). Using a highly developed 8-strand braiding process, the C/AC, it also received a special silicone surface treatment. In concrete terms, this means that phenomenal throwing distances can be achieved because the surface is particularly smooth and at the same time extremely resistant to abrasion. A perfectly braided fishing line for predator fishing and demanding sea fishing on rocky surfaces off the coast.
